

# General Spider Cutters

*Chews Through Tough Drain Clogs – Coming & Going!*

Turn General's new "Spider" Cutter loose on your next drain-cleaning job.

This new double cutter, nicknamed "The Spider", features both front and rear blades. Cutting starts as the cable feeds into the line – and continues as it retracts. That doubles your chances of removing stubborn stoppages, and does a more thorough cleaning job.

General offers two "Spider" models – the Double U-Cutter and the Double Heavy Duty Side Cutter. And each comes in 3" and 4" sizes. General's Spider cutters can also be adapted to sectional machines – or to other brands of drain cleaners.
