

# Maxi-Rooter®

## COMES THROUGH FOR YOU

Start with a slim 23" profile that lets you get the machine through just about any door. Include a big capacity drum that holds 125 ft. of 3/4" or 150 ft. of 5/8" cable. Mount it on a practically indestructible aluminum frame, and drive it with a heavy-duty quiet 3/4 hp motor. Add a power cable feed, and you're beginning to see what goes into General's Maxi-Rooter.

For the portability you need: The Maxi-Rooter rolls on 10" ball bearing wheels and has V-belt stair climbers for easier transport up and down stairs. A truck loading wheel mounted on the handle and lifting handles on the frame are almost like having a helper when you lift the machine into your truck.

More help to you: A see-through inner drum cage so you can tell how much cable is left in the drum, a convenient built-in tool box large enough to hold a set of cutting heads and some tools, and a wheel brake to hold the Maxi-Rooter in position.

Cables are super-tough Flexicore® with an integrated wire rope center.

The Maxi-Rooter packs maximum power, portability, and reach into one tough piece of equipment.

#### Convenient Tool Box

A tool box large enough to hold a set of cutting heads and some tools is built into the back of the Maxi-Rooter.

#### Lift Handles

For easy truck loading, tip the Maxi-Rooter on its loading wheel, then lift and slide into truck using lift handle on front leg of machine.

## Flexicore® Cable Wire Rope Center Construction

Heavy gauge wire is coiled around 49 strand wire rope and then heat treated. This cable has unequalled strength and the right amount of flexibility. It's so tough, it has a one year warranty against defect or breakage.
