Sheath fits over cable for easier repairs. For 5/16", 3/8", 1/2", 5/8" and 3/4" sizes.

RS Repair Sleeve

In 3/8", 1/2", 5/8", and 3/4" sizes.

Cables

Flexicore® Cable

Wire Rope Center Construction

Heavy-gauge wire coiled tightly around 49-strand aircraft-type wire rope and heat treated. Has unequalled strength and the

right amount of flexibility. So tough it carries a one-year warranty against defect or breakage.

Flexicore Patent Nos. 2,244,735 and 2,849,870

General Flexicore® Cable with Male and Female Connector

Sectional Cables

Sectional cables for the Root 66, I-95, Model 88 and Rodrunner snap together in a second and are taken apart quickly with a coupling wrench or key. The open coils screw into the line making it easier to clear long lines with less effort. They come in all-purpose Flexichain which has a chain center, or stiffer Proflex which has a spring center, and a hollow style. They're available in a variety of lengths and connectors for General and competitive brands. With the more recently developed "G" connector, no torque is put on the locking pin when running in reverse, making it a more durable coupling.
