

# Uni-Stand™

## Operating Instructions

General's **Uni-Stand** supports your hand-held drain cleaner while you're working in tight spaces under kitchen and bathroom sink cabinets. It fits the Super-Vee®, Power-Vee®, Handylectric® and BD Drain Gun. It fits many competitive hand-held drain cleaners as well.

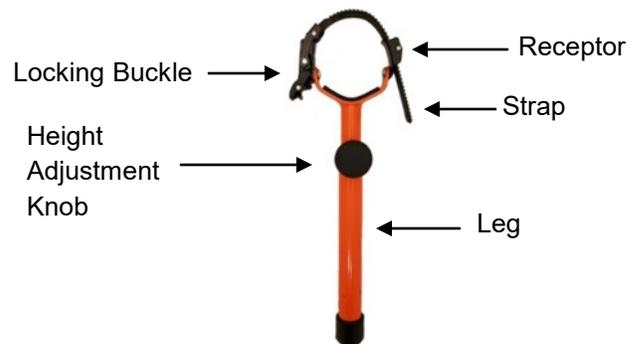

### ⚠ WARNING

Read, understand and follow all safety warnings and instructions provided with your drain cleaning machine. Failure to follow the warnings and instructions may result in electric shock and/or serious injury. Save all warnings and instructions for future reference.

### ⚠ WARNING

This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

### FEATURES:

### ASSEMBLY:

1. Open the clamp by lifting the locking buckle.

2. Push and hold receptor where indicated to open and fully release the strap.

3. Close the locking buckle.

4. Lay the drain cleaning machine on its side on a flat surface. Place the Uni-Stand onto the drill housing.

*Note: You may prefer to mount the Uni-Stand on top of the motor housing (as shown here) so that your machine operates upside down. This offers easier access to the trigger switch during operation.*

5. Wrap the strap around the drill and slide it into the receptor until snug.

6. Release the locking buckle and push the strap into the receptor an additional 2-3 clicks, then close the locking buckle firmly to clamp the Uni-Stand securely into place.

7. Turn the knob counter-clockwise to release the leg. Push/pull the leg to adjust it to the height you need to work comfortably. Then, turning the knob clockwise to secure the leg in position.
4. Squeeze the trigger and rock the machine forward as the cable spins into the line.

## OPERATION:

1. Place your machine within one foot of the drain opening.

2. Slide the cable into the drain as far as it will go.
3. If you are using the Super-Vee, pull back on the Grip Shield to engage the Snake Grippers. If you are using the Handylelectric or BD Drain Gun, turn the chuck to lock or release the cable.

5. Slide the Grip Shield forward to release the Snake Grippers (or rotate the chuck to release the cable) and rock the machine back.

6. Repeat rocking the machine forward and back as you feed the cable into the line.

*Note: If you are using the Power-Vee, position the machine within 6 inches of the drain opening. Pull the trigger, then squeeze the feed lever to feed the cable into the line. When you meet an obstruction, rock your machine forward and back as you work through the stoppage.*
