

# *Gen-Eye Micro-Scope 3<sup>®</sup>*

## *Now with Stronger Pushrod, Sonde and Wi-Fi*

The Micro-Scope3 features a stronger pushrod to inspect 1-1/2" to 4" drain lines up to 100 ft. long. With the addition of a sonde to the pushrod, you can locate the camera easily with General's Hot Spot locator. And Wi-Fi has been added to the Command Module to view and record inspections on your smart phone or tablet.

The powerful Command Module lets you watch the action on a big 7" LCD color monitor for crisp, clear pictures. The USB port allows you to record videos or photos on a flash drive with the one-touch record button. It's packed with other great features like 4X digital zoom, voice-over recording, date and time stamp, and LED Dimmer Control.

The compact, lightweight tool offers the versatility to inspect drain lines from 1-1/2" to 4" in diameter, many toilet traps, and hard-to-inspect locations – like ducts, furnaces, and crawl spaces. The Command Module attaches to the reel with an adjustable mount for optimal viewing angles. The reel carries up to 100 ft. of micro push-rod with color camera.

A 3' Probe Rod attaches to the top of the monitor to let you conveniently inspect difficult-to-access locations. Three standard attachments help improve your viewing angle or retrieve objects.
