

Root 66[®]

It's Three Machines in One

Scan to see webpage

The Root 66 is a real advance in sectional cable machine design. No mid-range machine has its versatility and power.

You can clear 2" to 3" lines up to 125 ft. long with 5/8" sectional cables, and clear 4" lines up to 150 ft. long with 7/8" sectional cables – and you can switch from one to the other in seconds, without touching the jaws, without an adapter, without tools. And for sink drain work, slip on a drum that holds smaller cables.

To operate, just feed a cable into the line and slide the back end into the machine. The excess cable goes into a guide tube. Turn on the sealed motor, press down on the handle, and the Root 66 starts spinning the cable at 400 rpm.

The cable stops rotating as soon as you lift the handle, so there's no additional torque buildup. When using a drum for small drain work, the drum stops turning when you lift the handle to the neutral position.

The Root 66 has a wide four point base for greater stability. Its interlocking tubular construction also gives it excellent durability. To protect the gears from dirt and for easier cleaning, the machine has two internal plastic shields.

“ We compared several machines, and for strength, durability, ease-of-use, and function, only Root 66 met our standards. ”

Tyler Scott, Pipe Dreams Sewer & Drain, LLC

Optional Small drum

Clear 1-1/2" – 2" lines with 5/16" x 25' cable.

Key Features

- Clears 1-1/4" through 4" drain lines.
- Drives both 5/8" and 7/8" sectional cables.
- Change cables instantly—no tools or adapters required.
- Small drum holds 25 ft. of 5/16" Flexicore cable to clear 1-1/4" to 2" lines.

Cable Carriers

Easily transport cables to and from the job with light weight Velcro strap with handle.
