

# AutoCut®

## Copper Tubing Cutter

AutoCut® copper tubing cutters are a great tool to have when you don't have enough swing room to use a full-size tubing cutter. You can cut copper tubing with less than one inch of clearance. Or you can easily handle close stub-out work. And it's quicker than conventional copper tubing cutters.

Just snap it onto the tube, close the gate and turn.

The cutter wheel automatically tightens as you turn the AutoCut – no knobs to twist. The cutter wheel is spring loaded to provide a constant cutting pressure, so you'll never accidentally crimp the tubing.

For extra leverage in awkward spaces, you can get a Ratchet Turning Handle. It slides over the AutoCut from either side for maximum ease of operation. The AutoCut copper tubing cutters have long-lasting hardened steel cutting wheels that are easy to replace when the time comes. Keep all three in your toolbox. Watch out though, they'll spoil you.

# AutoCutPL®

## Plastic Tubing Cutter

The compact, convenient AutoCutPL® plastic tubing cutter is an easier way to cut plastic tubing. It makes clean, uncrushed, square cuts quickly – and with less effort!

It fits in the palm of your hand. Great for easy use in tight spaces, AutoCutPL® lets you cut both PEX and CPVC-CTS plastic tubing with less than one inch of clearance!

Just remove the blade guard and close the gate over the tube. Then turn AutoCutPL® in the direction of the arrows as you evenly squeeze the gate closed. Easier to use than conventional plastic tubing cutters, it cuts plastic tubing in as little as one rotation! You get a clean, uncrushed, square cut – with no burrs!

Get hundreds of cuts with accuracy and ease. The handy blade guard protects your fingers – and the easily replaceable AutoCutPL® blade – from workplace and toolbox damage.
