

# Gen-Eye X-POD Plus®

**Plus Battery Adapter, Wi-Fi, and Distance Counter**

Scan to see webpage

The Gen-Eye X-POD Plus® sewer camera system includes the Gen-Pack™ battery adapter, Wi-Fi transmitter, and an on-screen distance counter as standard equipment to boost productivity and profitability!

Depending on battery type and settings, the built-in Gen-Pack battery adapter lets you operate the camera system for up to 12 hours in remote locations with limited access to power. Fuse-protected to safeguard your equipment investment, the Gen-Pack battery adapter is also available separately. Compatible with Milwaukee® M18 battery or equivalent. Battery and charger are not included.

X-POD Plus makes recording and sharing inspections easier. You can record videos and photos on a flash drive using the USB port or send the recording to your customers via your smartphone or tablet with the built-in Wi-Fi transmitter.

The on-screen distance counter shows how far the camera has traveled down a line – in feet or meters. And for optimum accuracy, settings can be adjusted for full-size or mini-reel configurations.

The lightweight, popular X-POD systems combine camera, reel, and monitor into one compact package. A durable docking arm supports the Command Module – and permits height and angle adjustments for optimal viewing.

Gen-Pack battery adapter is also sold separately.

“The Gen-Eye image was so sharp that we could clearly read the logo on the bat itself!”

Keith Walker, McNeill Plumbing

## Key Features

- Integral camera system – camera, reel, monitor in an all-in-one package.
- One-touch video or photo recording on Flash Drive.
- 7" LCD color monitor for easier viewing.
- Gen-Pack battery adapter for remote operation.
- Self-leveling color camera automatically keeps the picture right side up.
