

JM-1000™ Mini-Jet

We Include Everything but the Weight

Scan to see webpage

The lightweight, compact JM-1000 Mini-Jet gives you 1500 psi of cleaning power, yet weighs just 23 lbs. Clear grease, sand, and ice from 1-1/2" to 3" lines. The pump and motor assembly are safely contained in a rugged metal diamond plate case that can handle abuse in the field.

Water jets use a stream of high pressure water that hits the stoppage and flushes it away. The thrust of the nozzle drives the hose down the line and gives you wall to wall cleaning action.

Vibration helps the hose slide around tight bends and farther down the line. This is what separates General's Jet-Set from ordinary pressure washers. It breaks the initial tension between the surface of the hose and the walls of the pipe, increasing cleaning power.

The JM-1000 Mini-Jet generates 1500 psi at 1.4 gpm, yet pulls only 13 amps. Clear sinks, tub and, laundry drains up to 50 feet long. Order the High Performance stainless steel hose with Teflon core for increased cleaning power.

Pound for pound and dollar for dollar, the Mini-Jet is a great (and small) investment.

Lightweight & Compact

The lightweight, compact Mini-Jet weighs just 23 lbs. so it's small enough to store conveniently in your truck.

Key Features

- Clear grease, sand, and ice from 1-1/2" – 3" lines.
- Rugged metal diamond plate case handles abuse in the field.
- Generates 1500 psi at 1.4 gpm, pulls only 13 amps.
- Compact, lightweight unit weighs just 23 lbs.
- Optional High Performance stainless steel hose for increased cleaning power.

“The JM-1000 is perfect for spot-clearing kitchen stoppages. The compact size makes it great for one-man operations and it's perfect for much of the work I do!”
