

JM-2512 Typhoon® Trailer Jet

Big Cleaning Power in a Tough Package

The JM-2512 Typhoon® trailer jet is ideal for clearing big lines or remote jobs far from a water source. Twelve gallons of water pulsates down the line every minute at a powerful 2500 psi to blast lines clear of grease, sediment, and debris. The 200-gallon holding tank carries enough water to handle remote applications where access to water is limited.

A 690 cc engine with electric start powers the 2500 psi, 12 gpm pump with Vibra-pulse® through a V-belt reducer. Two hose reels – an electric rewind jet hose reel with 400 ft. x 1/2" capacity featuring a variable speed controller, and a supply hose reel carrying 150 ft. x 3/4" hose – are mounted at the rear of the unit next to the pressure gauge and output valve. Engine controls, including an hour meter, are mounted within easy reach in the lockable tool box with slide action doors just below the reels.

The Typhoon is mounted on a heavy duty trailer rated for 3500 lbs. per axle with bearing buddies, and rides on 15" radial tires with modular wheels. A splash guard at the front protects the pump and engine from road debris. The body is protected by a durable powder-coated epoxy finish for added weather protection.

Standard safety features include electric brakes, safety strobe light, three safety cones with holder, rear fold down stabilizer jacks, and retractable guide arm. An anti-freeze system protects the unit from freeze damage. Complete with spray wand.

Easily accessible Variable Speed rewind control, along with pressure gauge and output valve mounted between the hose reels.

Remote control panel protected inside a locked toolbox.

Key Features

- Clears 3" to 10" lines, up to 400 ft. long.
- 690 cc (24 hp) engine with low oil shut off, and electric start.
- Heavy duty 2500 psi, 12 gpm pump with Vibra-pulse®.
- 200 gallon holding tank carries enough water for remote jobs.
- 400 ft. capacity hose reel with variable speed electric rewind.
- 150 ft. capacity supply hose reel.
- Anti-Freeze system protects unit from freeze damage.
- Electric brakes, safety strobe lights, rear stabilizer jacks, and retractable guide arm.
- Rides on four flat-free foam core tires and heavy duty easily maneuverable frame.
- Optional Cart-Reel for clearing indoor drains.

High Performance Nozzles

The Typhoon's High Performance Nozzles incorporate patented fluid mechanics that significantly increase thrust, pulling power, and cleaning power without needing to increase water flow or pressure.

“ You can drag a full load of water right to the job – and not waste time filling-up at the site, and the antifreeze really helps in winter. Competitive jets don't have those features. ”

Keith Johnson, Accurate Cespool
