For the Professional

Flexicore® Three Foot Closet Auger

Professional 3 ft. Flexicore Closet Auger is the ideal tool for breaking up stoppages or removing lost objects in clogged toilet bowls. Durable double layer Flexicore construction gives the snake tremendous resistance to kinking. The Flexicore closet auger works where plungers fail.

The tough outer steel tube is 3/4" in diameter. Inside, a galvanized steel rod turns the cable. Other features include a vinyl bowl guard, vinyl grip handle and turning handle, and a "Grip Clip" for securing the cable.

“As a plumbing service contractor, I use Teletube toilet augers from General. The Teletube can almost do it all!”
Alan Trout of Trout Plumbing LLC

Teletube® Six Foot Closet Auger

Heavy-duty 6 ft. Teletube Closet Auger clears stoppages beyond the bowl. No need to lift the bowl, because the Teletube has an extra three feet of cable stored inside the guide tube until you need it. After you've worked the first three feet into the bowl, you can go three feet farther simply by pressing a button and pulling the crank handle.

Outer steel tube is a hefty 1-1/8" diameter. The hexagonal guide tube is even tougher than the steel rod we use in our three foot closet augers. The Teletube weighs just a little more than the 3FL, too. Other features include a vinyl bowl guard, vinyl grip handle and turning handle, and a "Grip Clip" for securing the cable.

Down Head

Flexible down head follows bowl contours. It springs through sharply angled passages while protecting the inner walls from chipping and breaking.

Urinal Auger

Gets through urinals where other snakes can't. A specially designed hollow spring has the toughness and flexibility to negotiate tight urinal bends. Telescoping Teletube® model TU4 features a 48" spring for clearing stoppages beyond the urinal. And it has a rust resistant steel tube and rubber bumper to protect urinal bowls.

Closet Auger Bag

Closet Auger Bag keeps the closet auger contained and out of sight as it's carried to and from the job.

Flexicore Cable Double Spring Construction

Two layers of tempered spring steel are coiled tightly over a core of 49-strand wire rope. It gives the tool tremendous resistance to kinking. So tough it carries a one-year warranty against defect or breakage
