

Flexi-Router Junior®

Flexible-Shaft Drain Cleaner

Scan to see webpage

Lightweight, Compact Package with a Heavy-Weight Punch

General Pipe Cleaners redefines high-speed, flexible-shaft technology again with the Flexi-Router Junior® drain cleaner – the next-generation in our line of flexible-shaft machines!

It features an integral variable speed motor with an air actuated foot pedal that lets you adjust the motor speed from zero to 2,400 rpm. This allows you to have both hands free to safely guide the flexible-shaft into the line. The shaft spins up to 10 times faster than conventional drain cleaning tools for a more thorough cleaning job.

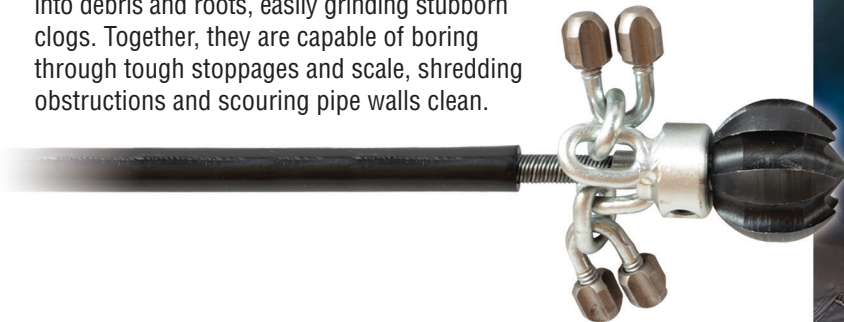

The reel holds 50' x 1/4" (6 mm) flexible-shaft to clear 1-1/4" to 3" lines. The stronger, stiffer shaft with an enhanced sheath is flexible enough to navigate tighter bends and get through 1-1/4" lines, yet tough enough to clear 3" drain lines.

Enhanced safety slip clutch design protects the flexible-shaft from damage. But if you ever do get into trouble General's flexible shaft is field repairable. The durable metal frame weighs only 20 lbs, making it easy to get the machine smoothly to and from the job.

The Flexi-Router Junior works with your sewer inspection camera system to instantly inspect your results.

Two-part cleaning array

General's Innovative, cutter system combines the unique ClogChopper® with hardened steel chain cutters to make a formidable combination that dig into debris and roots, easily grinding stubborn clogs. Together, they are capable of boring through tough stoppages and scale, shredding obstructions and scouring pipe walls clean.

Flexi-Router Junior®

Flexible-Shaft Drain Cleaner

What is Flexible Shaft Technology?

Flexible-shaft technology is faster and more thorough than traditional drain cleaners. The flexible-shaft spins more than 10 times faster than drum machines. At speeds of up to 2,400 RPM, the cutters quickly grind up stoppages and scour the walls of the pipe. The flexible shaft is safely protected inside a sheath so it's easy to handle – no spinning drums.

Flexi-Router Junior Features

- Powerful integral variable speed motor—0 to 2,400 RPM.
- Foot pedal allows your hands to be free to guide the flexible shaft.
- Stronger, stiffer flexible-shaft and durable sheath.
- Flexible enough to navigate tighter bends in 1-1/4" to 3" lines up to 50 feet long.
- Two-part cleaning array combines ClogChopper® with hardened steel chain cutters.
- Durable metal frame weighs only 20 lbs. for easy transport to and from the job.
- Enhanced safety slip clutch helps protect the flexible shaft.
- General's flexible-shaft is field repairable.
- Built here. Backed here.
