

Flexicore® Closet Augers

A tough Machine in a Compact Lightweight Package

Scan to see webpage

The ideal tool for breaking up stoppages or retrieving lost objects in clogged toilet bowls. Works where plungers fail. The patented Flexicore cable is made from two layers of spring wire wrapped tightly around a wire rope core. It resists kinking and breaking, yet has just the right flexibility to get through low flow toilets.

Press button, pull back on the handle, and you've released three more feet of cable.

The heavy-duty Teletube Closet Auger lets the operator clear stoppages beyond the toilet bowl. No need to lift the bowl, because it has an extra three feet of cable stored inside the guide tube until you need it. After you've worked the first three feet into the bowl, you can go three feet farther simply by pressing a button and pulling the crank handle.

Both have a vinyl bowl guard that protects the bowl against scratching, and a large grip handle and turning handle for easy operation.

No Wrench Coupler

Closet Auger Bag keeps the closet auger contained and out of sight as it's carried to and from the job.

Down Head

Flexible down head follows bowl contours. It springs through sharply angled passages while protecting the inner walls from chipping and breaking.

Flexicore Cable Double Spring Construction

Two layers of tempered spring steel are coiled tightly over a core of 49-stand wire rope. It gives the tool tremendous resistance to kinking. So tough it carries a one-year warranty against defect or breakage.

Spin Drive®

The Spin-Drive is a lightweight, easy-to-operate, manual drain machine for 2" through 4" drain lines. A comfortable metal handle on the crank turns the cage smoothly on self-aligning oilite bearings mounted on the front and rear of frame. A convenient carrying handle is mounted on the cage for easier portability. Equipped with

Flexicore wire rope center cables, assuring you long life, as well as the strength and flexibility to do a good cleaning job.

X-25 Handy®

Scan to see webpage

This easy-to-use tool clears sinks and bathroom drains smoothly and easily. The patented Quick-Grip™ chuck tightens firmly on the cable with just a quarter turn. Three chuck jaws securely hold 1/4", 5/16" and 3/8" Flexicore® cable for a wide range of small-line jobs. The turning handle and tubular grip handle eliminate wear and tear on hands, making this drain cleaner tool simple to use.
