

The Metro®

A Tough Machine in a Compact Lightweight Package

Scan to see webpage

The variable-speed power cable feed makes The Metro® easier for your customers to use. The automatic feed drives cable into the line at up to 20 feet per minute. Put the feed in reverse and it retracts the cable easily too.

The Power Cable Feed and guide tube combination allows the cable to feed smoothly into the line while keeping your customer's hands clean and away from the spinning cable.

The Metro's heavy-duty reinforced frame can endure rough handling in the field. The big 10" heavy-duty wheels and a truck loading wheel make it easier to transport the machine to and from the job. A cutter holder on the frame keeps all the cutters within easy reach. And the fold-down handle makes the machine more compact to take up less space in the truck.

With a capacity of up to 100 ft. of 9/16" tough Flexicore® cable, the Metro sewer machine clears 3" - 4" lines.

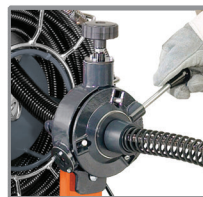

“ It really cuts down physical labor and makes work alot easier. At the end of the day, You can literally feel the difference! ”

Budd Stover,
Twin County Plumbing & Heating

Folding Handle

Variable-Speed Power Cable

Truck Loading Wheel

Key Features

- Clears clogs in 3" to 4" drain lines up to 100 feet long.
- Variable speed Power Cable Feed drives and retracts cable at up to 16 ft. per minute.
- Cage capacity of up to 100 ft. of 9/16" Flexicore® cable.
- Heavy-duty reinforced frame and cage support shaft can endure rough handling in the field.
- Handle folds for space-saving convenience in the customer's vehicle.
- Ten-inch wheels and a trunk loading wheel make for one-person handling.
- Passive brake system holds the machine in place on the job and in a vehicle.
- Momentary contact reverse switch helps prevent cable tangling in the cage.
- 1/3 hp capacitor motor has plenty of power.
